

# Cirrus

Upper Level Cloud

# Cumulus

Mid Level Cloud

# Stratus

Lower Level Cloud

To make a cirrus cloud:

1. Apply glue to the paper above.
2. Press the cotton ball to the glue then remove, leaving a few wisps behind.

**Describe what it looks like:**

What kind of weather might be coming?

To make a cumulus cloud:

1. Pull at the cotton ball to fluff it out.
2. Flatten the bottom of your cloud, and glue it in the space above.

**Describe what it looks like:**

What kind of weather might be coming?

To make a stratus cloud:

1. Use your pinky to push out the center of the cotton ball.
2. Unravel the ball into a long sheet, glue a section of the sheet above

**Describe what it looks like:**

What kind of weather might be coming?
